

Protecting, maintaining and improving the health of all Minnesotans

June 11, 2013

Mr. Dwight Hedgpeth
Rhomar Water Management, Inc.
Suite 100
2103 East Rockhurst Street
Springfield, Missouri 65802

Dear Mr. Hedgpeth:

Subject: Approval of EnviroGard™ Ultra, EnviroGard™ -100 and EnviroGard™ RTU
Inhibited Propylene Glycol Heat Transfer Fluids for Use in Closed Loop Vertical Heat
Exchangers in Minnesota

The Minnesota Department of Health (MDH) has reviewed your request to allow EnviroGard™ Ultra, EnviroGard™ -100, and EnviroGard™ RTU (Ready to Use) inhibited propylene glycols to be used in regulated vertical heat exchangers in Minnesota.

Three letters from NSF International to Rhomar Water Management, Inc. dated May 21, May 21, and May 29, 2013, document that EnviroGard™ Ultra, EnviroGard™ RTU and EnviroGard™ -100, respectively, are registered nonfood compounds acceptable for use as a heat transfer fluid where there is a possibility of incidental food contact. The three EnviroGard™ products are included in the current NSF White Book™ listing of nonfood compounds.

Minnesota Rules, part 4725.7050, subpart 1, item E specifies that only food-grade or USP-grade propylene glycol and potable water may be used as heat transfer fluid. The MDH has also accepted food-grade or USP-grade propylene glycol with additives when a complete list of additives is provided to the MDH, documentation is submitted verifying that each of the additives is food-grade or USP-grade, and the product is listed by NSF International as a nonfood compound suitable for use where there is a possibility of food contact.

The MDH has determined that EnviroGard™ Ultra, EnviroGard™ -100, and EnviroGard™ RTU satisfy the requirements of Minnesota Rules, Chapter 4725, Wells and Borings and therefore may be used as heat transfer fluids in regulated vertical heat exchangers in Minnesota.

Approval of EnviroGard™ Ultra, EnviroGard™ -100, and EnviroGard™ RTU is based on the label and formulation information provided in your request, and is contingent on continued listing in the NSF White Book™ listing of nonfood compounds. Any change to the product name, formulation, or NSF listing status will result in suspension or termination of the MDH approval until such time as a new written approval is issued by the MDH.

Mr. Dwight Hedgpeth
